HOME THEATER

4K UHD 9.1.6 IMMERSIVE AV PREAMP PROCESSOR

AudioControl's next generation of high-performance preamp/processors enable home theater specialists and A/V integrators to create systems that deliver new levels of precision, power and control. The Maestro X9 supports the most sought after immersive surround formats, such as Dolby Atmos, Auro-3D, DTS:X and IMAX Enhanced, with 16-channels of balanced and unbalanced outputs including four user-configurable outputs. Both models offer a full complement of inputs for connection to the latest audio/video components, including 7 HDMI 2.0b inputs that fully support 4K UHD and HDR playback.

The new Maestro X9 processor houses the very latest in audio and video processing technology, featuring Dirac Live® room correction to overcome acoustic anomalies in any space, and ESS Sabre DACs that ensure unprecedented levels of detail and clarity along with earth-shaking, authoritative bass response.

Enthusiasts will enjoy intuitive app-based control, Google Cast, Airplay 2, aptX Bluetooth and Wi-Fi streaming connectivity options as well as integrated web-based configuration.

All of this outstanding technology has been wrapped quite elegantly within a completely new industrial design, distinguishing AudioControl's home cinema preamp/processor lineup from any other solution.
